

Meeting Minutes

Monday, March 8th from 10:00 – 11:00 pm

- Discussed the CodeIgniter Framework, and get everyone to look into the useful information on the site.
- Told everyone to look into web development using PHP, by running through .
- Need to host a test server using Apache HTTP Web Server
- As team members which part of the system they would most like to develop, such as database management (concurrency control), security (login & passwords), user interface (views, form management), etc.
- Logan and Ethan want to handle the database portion.
- Sam wants to handle security and password management.
- Ethan will try to set up the Apache test server on his laptop.
