- Logan
- Sam

Monday, February 26th from 1:00 – 2:00 pm

- Discussed our options for the software architecture for our software. After considering both the model-view-controller architecture and client-server architecture, we decided on MVC as it seem more appropriate given we only have to maintain one server/database.
- Started our analysis into the structural model of our software, giving the outline of the classes necessary for our system.
